

address	value	breakpoints
000000	000002	
000001	040102	
000002	0b0202	{ 000002 000007 }
000003	020005	
000004	010302	
000005	030006	
000006	030206	
000007	010304	
000008	000307	
000009	030309	
000010	000001	

The diagram illustrates a memory layout with addresses from 000000 to 000010. The values stored at these addresses are: 000002, 040102, 0b0202, 020005, 010302, 030006, 030206, 010304, 000307, 030309, and 000001. A bracket on the right groups the addresses 000002 and 000007, with arrows pointing to the values at those addresses (0b0202 and 010304).
